

AC and DC Distribution Panels

The Propel Electric AC and DC Distribution panels are designed for on-site customization of distribution. Adding or removing circuits is easily done in the field.

The panels are designed for single, two or three phase distribution and can incorporate source on/off indication. They can be supplied up to 54 consumer slots, allowing for complex sub-panel distribution being simplified with easy overview.

Additional highlights of the AC and DC Distribution Panels:

- Single phase Consumer
- Two phase Consumer
- Three phase Consumer
- 0.5 to 63A per consumer
- Compact design
- Power "Source On" Indication
