Alarm Panels

The Propel Electric Alarm Panel is a cost effective solution, with the possibility of monitoring up to 32 individual points. The inputs can accept Normally Open or Normally Closed contacts. Each input can be programmed to control both of the two alarm relays for group alarm outputs. All inputs will, in default mode, activate the alarm relay and the siren relay.

Cable monitoring provides extra security to the alarm system. Configuration either by dip switches on the back of the unit or by PC.

Additional highlights of the Alarm Panels:
- 8, 16, 24 or 32 alarm points
- Compact design
- Easy to Install
- 24VDC Supply
- Normally open or normally closed inputs
- Programmable delays for each individual input
- Color option for alarm indication
- Built in Buzzer
- Delay from 25mS to 999S
