

## Custom Monitoring System

The Propel Electric Custom Monitoring systems is built so together they will provide a complete vessels monitoring system that can include:

- Bilge monitoring
- Engine monitoring
- Auxiliary engine monitoring
- Generator Electric Monitoring
- Shafts bearing temperature
- Compressor running time monitoring
- Tank level monitoring
- Valve positioning
- DC systems monitoring
- And many more features

The system is custom-designed to fit your specific needs with analog, switched, data, and calculated inputs to be remotely collected and processed at a central point for further display in simple and clear indication of status and alarms.

Designed to meet and beat any marine approval requirements.

Additional Highlights of the Custom Monitoring Panels:

- Up to 10,000 monitoring points
- Displaying possibilities onboard up to 32 locations
- Remote monitoring on shore is possible
- 24VDC powered
- High capacity processing power for no delays
- Off the shelf parts for quick in-field support
